

THE ADVOCATE.

NEWS OF THE WEEK.

One of the leading banks of Derry, France, has suspended payment.

The Minneapolis Tribune has been sold for \$400,000.

Nearly every bridge in Pulaski county is reported washed away or badly damaged by floods.

Striking Scotch Furnace-men, out twenty-one weeks, at a loss to them of \$30,000, are about to succumb.

Col. W. C. P. Breckinridge who was sick last week at Pensacola, Florida, is reported much improved.

The company of C. Lamar and Miss Louise are to be drowned while rowing in the canal at Augusta, Ga.

Greece has been suffering terrible snow storms, and the people suffer from lack of food. Wolves figure in the situation.

The German Government has warned the ship owners of the Baltic not to send any war material to the Chinese insurgents.

Mr. John Dunn, of Texas, tracked a burglar who robbed her house, and when he attempted to kill her with an ax, shot him dead with a Winchester.

E. H. Daniels, of Princeton, proposes a street-railway in that town, if the authorities will exempt it from taxation for fifteen years.

"Farmers are very uneasy about the crop. They think the last year's crop is the best yet raised in the United States."—Georgetown Times.

The Mt. Carmel, Pa., shaft colliery suspended indefinitely, owing to the depression of the coal trade. One thousand hands are thrown out of work.

London papers have been printing extended obituaries of two peers and of Sir Joseph W. Bazalgette, an eminent engineer, and now all three are called to be alive.

Cattelsburg has contracted with the Carpenter Electric Light Company, giving them a ten year franchise. The streets will soon be lighted with electric lamps.

James A. Simmons, on trial in New York for assisting in the wreck of the Sixth National bank, has been found guilty of the embezzlement of \$622,000 worth of bonds.

A number of Eastern men have been looking at the Carter county caves with the intention of building a hotel and running a branch railroad to the caves.

Bradley, of this city, will ship next week from Paris to Hamburg, Germany, twenty-two carloads of walnut logs, purchased in surrounding counties."—Georgetown Times.

A strike occurred at the Woonsocket mill, Providence, R. I., on account of the new price list posted, making a reduction in wages of weavers. Three hundred and forty weavers are out.

Another box of Italians has been quarantined in one house on Greenup avenue. Saturday evening they were carrying straw for fuel. From a mule stand-point they are comfortably situated. They may be good workers, but it will be a long time before they can be good citizens."—Ashland Signal.

The attorneys of Charles R. Kincaid charged with the murder of Hon. Fes. Taulbee, asked Judge Hager of the Criminal Court of the District of Columbia, for a postponement of the trial until June, in order that Senator Voorhees, who is now under arrest at the Hot Springs, might be on hand. The Judge refused the request and the case was to go to trial yesterday.

Gen. J. M. Palmer was elected U. S. Senator from Illinois on Wednesday. Messrs. Cockrell and Moore, two Alliance members, voted for him, thus making his election possible. This reflects the less acrimonious the death of Senator Hearst, of California. The Senate now stands, 47 Republicans, 39 Democrats and 2 Farmers Alliance.

Attorney David Poston was shot by Col. H. Clay King, another prominent attorney of Memphis, Tenn., on Tuesday, and died on Wednesday afternoon. Mr. Poston was a member of the firm of Poston & Poston, and was counsel for Mrs. Gen. Pillow in her suit with King. It will be remembered that Col. King became infatuated with the woman and neglecting his own family, went to live with her on his Arkansas plantation. While there she induced King to deed all his property to her. These deeds she placed on record, and King learning that the deeds were recorded, was enraged and he had him shot from "her" plantation. In the suit King brought for the recovery of his property, Poston was one of her attorneys, and he was not over choice in his comments on King's conduct. In revenge King waylaid and killed him.

ASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any preparation known to me." H. A. ASCHER, M. D., 111 So. 4th St., New York City.

"The use of 'Castoria' is so universal, and its merits so well known that it seems a waste of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CAULON MATTHEW, D. D., Late Pastor Bloomsdale Reformed Church, New York City.

"For several years I have recommended your 'Castoria,' and still always continue to do so as it has invariably produced beneficial results." EDWARD P. PARSONS, M. D., "The Watchdog," 15th Street and 7th Ave., New York City.

THE CHAPMAN COMPANY, 17 MURRAY STREET, NEW YORK.

A Reproach to Men.

Think for a moment what is implied in the single fact that in no part of the world is it deemed safe for a woman to go alone after dark, nor, in many localities, by day even. It is not enough to reply that woman must have a trustworthy masculine escort because she is timid. Why should she be timid? Under similar circumstances a man may fear the personal violence of an enemy or the loss of his money and valuables. A woman has to dread man's "wildness and the chances of the dark." In plain words, she fears that, if unattended, some man will seek to rob her of her honor. And is not this fear of hers an acknowledgment of the fact that the majority are powerless to restrain the minority, or to say that improvement in this regard is impossible? If in the vicinity of every large town in the United States there lurked a dozen or more force wolves that, after nightfall, assert that such a state of things, when once found to exist, would come to a speedy termination; for every man would feel that the common safety of all depended on the exertion of his strength in the contest with the wild beasts. But let it be understood that the honor of every woman is endangered when she goes from place to place alone at night, and we accept the fact as no reproach on our common manhood, but merely fancy that all requirements of duty are satisfied if we provide defenseless women with a responsible male escort."—Oscar Fay Adams in North American Review.

Making Seamless Tubes.

Chamber's Journal speaks of what promises to be an important industry that has been established at Swansea. This is a new process for the manufacture of seamless tubes from blocks of solid metal, and is named after its inventor, two brothers, the Maunesses of Swansea. The method will meet with its widest applications in the treatment of steel, and the metal selected must be of the very finest quality. Red-hot bars of the metal are passed between conical rolls of peculiar construction, and they pass out at the other side in the form of seamless tubes. A peculiar feature of the process is that in these tubes the fibre of the metal, instead of being parallel, is twisted round in a spiral, thus giving immense strength to the product. Great power is requisite to produce these tubes, and this is achieved by the employment of a fly wheel, which weighs sixty tons, and which stores up then ten thousand horse power. Tubes any thickness or diameter can be produced by a change in the position of the conical rolls. The new process will have many applications in different departments of steel manufacture, among which may be noted hollow rails and tubes for bridge construction of large span. The works are in the hands of an English company and have lately been visited by representatives from the Admiralty, Board of Trade, Lloyd's and other public bodies.

A public hall at Kilgore, a mining village on the Newport News railroad, near Catlettsburg, terminated in a battle Monday night. Over 100 shots were fired, and when the lamps were relighted it was found that six men had been seriously wounded. At the hour of the men are said to be fatally hurt.

Of the 600,000 live cattle exported from the United States and Canada during 1890, 100,000 went to Liverpool, 137,735 to London, 74,189 to Glasgow, 64,716 to Newcastle, 17,829 to Aberdeen and 17,448 to Hull.

Barren river is so high that the people on the north side are shut out from Bowling Green. The Times say that the flood is higher than it has been since 1880, and is doing great damage to the country.

Stranger—"Who is that large, fierce-looking man?" "Oh, that is Bagley. He teaches the infant class in the public school."—Texas Sittings.

The certain way to judge a man's position in society by his dress is when you see him in the penitentiary garb."—Texas Sittings.

It is well to remember that while the only good Indian may be a dead one, he is not necessarily a starved one.—Life.

A Leather-Sorting Machine.

Shoe manufacturers are interested in a new instrument, the electric micrometer, which is applied to the sorting of pieces of leather according to their thickness, and distributing them in separate receptacles, its capacity in this line extending to the separation of taps which vary in thickness as little as one-thousandth of an inch, and this at the rate of 5,000 taps an hour. Besides sorting the pieces of leather, the machine automatically records the number placed in each receptacle. When the apparatus is in operation, all that is required of the attendant is to put the taps in a trough-like box. A follower is then adjusted behind the pieces of leather, and the micrometer fingers, which are fed around by a ratchet movement, pause a short time over the receptacle for taps, and when a micrometer finger reaches one of these bins in which the tap which it holds should be dropped, the inner extension of the finger touches an electric contact, and the tap falls from the jaws. The operation of the finger is made to actuate a counter, which indicates the number of taps in every receptacle.—Boston Transcript.

Mrs. Amy A. Jackson has written a letter to the management of the World's Fair offering to have an exhibit of the big show of a number of "Old Hickory" relics in her husband's possession. This lady and her husband are the owners of Gen. Jackson's old homestead, the Hermitage, and a large number of Jackson relics, such as Jackson's State coach, his dining table, arm chair, desk and tableware. She is a lieutenant at the State of Tennessee. This lady and her husband are the owners of Gen. Jackson's old homestead, the Hermitage, and a large number of Jackson relics, such as Jackson's State coach, his dining table, arm chair, desk and tableware. She is a lieutenant at the State of Tennessee. This lady and her husband are the owners of Gen. Jackson's old homestead, the Hermitage, and a large number of Jackson relics, such as Jackson's State coach, his dining table, arm chair, desk and tableware. THE ADVOCATE.

HARRIS & MASON, Proprietors.

MT. STERLING, TUESDAY, FEB. 1891.

FOR PRESIDENT,
GROVER CLEVELAND,
Of New York.

FOR VICE-PRESIDENT,
JOHN G. CARLISLE,
Of Kentucky.

ANNOUNCEMENTS.

FOR CIRCUIT COURT CLERK,
HENRY R. BRIGHT,
of Montgomery County.

FOR SHERIFF,
JOHN C. RICHARDSON,
of Montgomery County.

We are authorized to announce Hon. Jas. D. Clark, of Christian county, as a candidate for Attorney General, subject to the action of the Democratic party.

Hon. J. L. Elliott, of Montgomery county, is a candidate for Attorney General, subject to the action of the Democratic party.

TO ADVERTISERS:

You are looking for the best medium through which to reach the people. You will find that medium in the **MT. STERLING ADVOCATE**. For the reasons that it has a larger circulation than any paper published here, and reaches more people who are tributary to Mt. Sterling than any other publication. Our books are open to advertisers and they can satisfy themselves of the truth of this assertion.

Senator Walcott, of Mississippi, has written a letter declining a reelection to the U. S. Senate. His term does not expire till 1895, still his successor is to be elected by the Legislature that convenes this year, and this made an early announcement of his purpose necessary.

The failure of the packed jury in the Hennessy murder case at N. O. to bring in a verdict of guilty against the Italians on trial there, so exasperated the people that on Saturday morning a mob went to the parish prison, broke in the doors and slashed and stabbed and hanged eleven of the prisoners and then killed the murder of Chief Hennessy.

THE DEATH ROLL.

JOSEPH MACHICA,
NANCY POLIZZI,
ANTONIO MARCHESI,
ANTONIO SCARFIDI,
ANTONIO BAGNETTO,
ROCCO GERACI,
JAMES CARUSO,
LORENZO COZZI,
LOUIS TRIMBLE,
FRANK MONROE,
PIETRO MONASTERIO.

On Wednesday night, October 15, 1890, between 11 and 12 o'clock, David C. Hennessy, Superintendent of Police of New Orleans, was shot from ambush on Girard street, near Basin. Six wounds were made, causing his death the following forenoon. Wholesale arrests were made that night and the following days. Italians in each instance were the parties incarcerated. On November 20th, the grand jury returned one indictment for murder, one for shooting with intent to kill while lying in wait against each of the following: Peter Natili, Antonio Scalfidi, Antonio Bagnetto, Manuel Polizzi, Antonio Marchesi, Pietro Monasterio, Bastian Incardona, Salvador Suzzeri, Lorenzo Comite, Charles Arabin and Charles Poliza as principals, and J. P. Machica, James Caruso, Charles Matranga, Rocco Geraci, Charles Paterno, Frank Romero, John Caruso and Aspero Marchesi as accessories. The grand jury investigated the case and fresh indictments were found against the prisoners. On Dec. 10 the prisoners were arraigned and on February 17 the trial was begun. The District Attorney requested that the State should ask for the removal of the case and would place on trial in the present issue Joseph P. Machica, Antonio Scalfidi, Antonio Bagnetto, Manuel Polizzi, Antonio Marchesi, Aspero Marchesi, Bastian Incardona, Pietro Monasterio and Charles Matranga, nine, leaving the other ten prisoners to be tried later.

It took two weeks to get a jury, and three panels of 1220 talemens were summoned. Some eight days were consumed in hearing the evidence. Ten days before the jury trying the prisoners brought in the verdict, the grand jury indicted two private detectives for tampering with jurors. The jury brought in the verdict Friday morning, finding six of the men not guilty—Matranga, Machica, Incardona, Bagnetto and the two Marchesi, and returning a mistrial in the case of the other three—Scalfidi, Polizzi and Monasterio.

ATTENTION, F. & L. U.

The F. & L. U. Legislative Convention will meet at Camargo, Montgomery county, on the first Saturday in April at 9 a. m. The Montgomery County Union will meet at the same time and place. A full representation is desired.

J. C. B. DUFF,
32-1st
County Sec'y.

The Courier-Journal has heretofore been inclined to allow the Con-Con to pursue the even tenor of its way with only now and then a not very friendly criticism on its action. Of late some of the delegates have been venturing such an amount of unnecessary abuse against the C.-J., that it has at last become tired and has opened its powerful batteries upon the convention and its work, and the members are reading some very unpalatable truths about the voluminous and exhaustive document they are preparing.

The Constitutional Convention on Friday reversed its action of a short time since, abolishing the office of District Commonwealth's Attorney and elevating the County Attorney to the office of Public Prosecutor before the Criminal Courts. This is well, for whether the members of the convention were right or wrong in their position, the people for whom they are framing a constitution are so plainly opposed to the above named measure, that it would assuredly have proven a strong point of objection to the new instrument. If the members will only go further and listen to the wishes of the people on a few other points they will be doing that which will bring a very large number of votes to the adoption of the new Constitution.

Dr. Clardy, whose announcement will be found in our column was among our people yesterday. He met many farmers, and his genial, pleasant manner, won them on every side. Dr. Clardy spoke here yesterday afternoon, and made as fine an impression publicly as he did privately. The Doctor runs as peculiarly the friend of the farmer, and a more upright, honorable and straightforward gentleman is not to be found. He has been abused and often grossly misrepresented, but has pursued the even tenor of his way, and when the convention of this year, and when the convention of next year, will find him as follows: that he will be difficult to down. The man who casts his vote for Dr. Clardy will vote for a good man.

Born, on the wife of W. B. Wilson, near Sideview, on March 13th, a girl.

CORRESPONDENCE.

Sharpsburg, Ky.

Mrs. B. F. Dorsey, of Mt. Sterling, has returned home after a several days' visit to our town.

Miss Hattie Peck and Mrs. Mattie Emmons are quite sick with measles.

Mr. Wash Stoner, of Cincinnati, is visiting friends and relatives here.

D. W. Boyd has returned from a visit to Louisville.

Andy Lewis, colt, has been appointed sexton of Crown Hill cemetery.

Mrs. J. J. Matthews leaves next week for Louisville and Cincinnati to purchase a spring stock of goods.

Camargo.

J. T. Bickel has quit a fall from his horse last week, but sustained no serious injuries.

Amos Turley, who has been under the weather for the past few days, is able to be out again.

Wm. Wyatt has rented the Adams place for the ensuing year for \$150.

A call meeting of Greubler Lodge F. & L. U. is desired for Friday, Feb. 20. Important business. A full attendance is earnestly asked.

WALTER CHENAUET, Pres.

J. N. Reid has been laid up with rheumatism for the last few days, but is able to be out again.

INOCENCE.

Spencer.

G. W. Sewell is the happy father of a young blacksmith.

Hiram Myers sold his pony to Sam, Seid for \$45.

Monroe, Peter and Sam. Greenwald returned from Frenchburg Thursday, where they went on a business trip.

Mrs. Jas. Cockran is confined to the house on account of sickness.

Ditto.

For seed oats go to Barnes & Trumbull.

HORSE AND TRACT.

Axtell's baby brother will be named Drexel.

Suisun, 2:18, will be campaigned this season.

The total number of pacers in the 2:30 list is 1,343.

Geers will reach Buffalo early in June with his stable.

Mattie H., 2:24, will be put in Crit Davis' hands this season.

The filly by Stamboul, 2:11, out of Trunkit 2:14, has been named in the J. C. E. Clardy, of Marchmont St.

Clardy, of Ky., has sold a filly by Cyclone, out of the dam of Gillette, to J. W. Fitzgerald, Mayville, Ky., for \$2,000.

Miss Russell (dam of Maud S. and Nutwood) and Russia, 2:28, own sister of Maud S., together with Honi, 2:17, and Amy Lee, 2:17, have arrived at Warren Park Farm to be bred to Axtell.

F. C. Barrow, of Chicago, has purchased from Fred & Lake, of Bloomington, Ill., for \$5,000, the brown pacer stallion Prince Hal, 2:16, by Brown Hal, 2:12, dam Lou, by Prince Pulaski.

John Donovan, St. Joseph, Mo., has purchased from J. E. Madden, Lexington, Ky., for \$3,000, the five-year-old bay stallion Clark Street 2:07, by Red Wilkes, dam La Hunter, by Jim Monroe; second dam Hannah C., by Blue Bull. Mr. Madden paid \$1,700 for him at the recent Basile sale.

Kate, the dam of Homestead 2:14, and Judge Salisbury, was a very fast mare, but so rattle-headed that she was useless for racing purposes. In the brood mare ranks she became as famous as if she had trotted in the tens in front of a field of 2:20 performers.

Location has apparently very little to do with the success of a truly great stallion. In the past few years mares have been shipped from the Atlantic seaboard to the stables that were located on the Pacific coast, and now all sections are contributing to the books of Axtell and Allerton. Both of their books are full for 1891, and Kentucky alone will send a car load to the coast of the latter at Independence, Ia.

An illustration of the increased value of some trotting mares from year to year is to be seen in the sale of Clara C., a daughter of Dictator and Joy, by George Wilkes, at the recent offering of W. R. Bradfield & Co., she selling for \$4,050, while at the same time a year ago she only brought \$1,450. This popularity of her blood lines being evidenced by the performance of several stars closely related to her in 1890, is the cause of her advancing in value, for as yet she is unrivaled as a producer.

M. E. McHenry, Geneseo, Ill., has sold to H. M. Atkinson, Wabash, Ind., a two-year-old colt by Mambrino Russell, dam Trillie, by Sitabone, a second dam scene, by Seabird; third dam Twilight, by Mambrino Pilot. Mr. McHenry purchased this colt at the recent Bradfield sale for \$2,500, and sold him to Mr. Atkinson for \$4,000. He has shown a great turn of speed.

A Kentucky writer well sounding the praises of George Wilkes makes the following statement:

The two fastest horses ever bred by one breeder are both grandsons of George Wilkes. Of course he refers to Axtell, 2:19, and Allerton, 2:13, but in doing so overlooks the fact that Sunol, 2:10, and Palo Alto, 2:12, were bred by Leland Stauffer. George Wilkes is great, but all the honors of the turf do not hover over his tomb.

Stout Bros. are gathering up Nutwood's get and will endeavor to give him a tremendous showing in the 2:30 list of 1891. They will do their utmost to place his name first, but at the same time it can be intimated that J. G. Davis will not be idle with the Alcantara, although his goal in 1891 is the 2:30 list. He is aiming for faster games as it would be expected either eight or nine in the select circle sheltered by the team before he cuts his next Thanksgiving turkey.

"It is just a little singular," writes George Morgan, of the Review, "that as Ash Grove, the home of George Wilkes, there should be bred the two fastest get of his sons. Axtell, three-year-old record 2:12, and Allerton, four-year-old record 2:13, are the fastest of the grandsons of George Wilkes, and are by Jay Bird and William L., both of which are owned at Ash Grove."

Up to Wednesday morning nine hundred and seventeen entries had been received for the \$25,000 Guaranteed Futurity Stake of the Kentucky Trotting Horse Breeders' Association. Only two California breeders had been heard from, when it was

E. S. CUNNINGHAM, MERCHANTS

GENERAL LIFE AND FIRE INS. AGENT.

—OFFICE WITH JUDGE PETERS—

Court St., - Mt. Sterling, Ky.

many of them will enter largely. As the entries did not close until last Monday, it is reasonable to suppose the entry list will number in the neighborhood of 1,200 when all the returns are in. This will make more than the guaranteed amount, and the indications now are that this stake will be worth to the placed horses in 1891 more money than was ever offered for any two trotting events.

The result of offering this big stake shows that breeders will not only support stakes with reasonable conditions, but will do so in a liberal manner. The Kentucky Association and its secretary are to be congratulated on the success of the Futurity, which is now so amply assured.—[Kentucky Stock-Farm.]

The sale of Palo Alto Belle for the handsome sum of \$19,000 was recently telegraphed all over the country. It now transpires that Miller & Sibley received, in addition to the \$19,000 in gold coin, the bay mare Alcantara by Alcantara. Palo Alto Belle has a record as a two-year-old of 2:23, and a three-year-old record of 2:23. She is a full sister to Hinda Rose, 2:24, Bell Boy, 2:19; St. Bel, 2:24; Chimes, 2:30; and Bow Bell, 2:32, being by Electioneer, out of Beautiful Belle.

Judged by the two tests Miss Russell is the greatest of trotting mares. In the past few years she has produced Maud S., 2:03, then she has more descendants in the 2:30 list than any other mare, living or dead, ever had. She was foaled in 1865, and is therefore 26 years old, and she now has ninety-three descendants in the list. She is the dam of four stars, two dams of trotters and four of her own immediate produce are 2:30 and better performers. Nutwood is her oldest son and has 51 in the list. Nutwood was foaled in 1877 and died in 1888 in the hands of Robert Bonner. He left two in the list, Leola Russell was foaled in 1881 and has four in the list. Mambrino Russell was foaled in 1878 and has eight in the list. The prospects are very favorable for Miss Russell to have over one hundred descendants in the 2:30 list before she dies.

The Woodburn Farm, Spring Station, Ky., has sold to the Duke of Marlborough, of England, for some time this \$20,000, the following animals: The three-year-old bay filly Seafarer, by Belmont, dam Water Lily, by Hero of Thorncliffe; second dam Siren, by Edwin Forrest; the three-year-old bay colt Super, by Lord Russell, dam Alice West, by Belmont; second dam by McDonald's Mambrino; the six-year-old bay mare, Calluna, by Harold, dam Clatonia, by American Clay; the four-year-old bay mare Alura, by Lord Russell, dam Alva, by Princess; second dam by Hamlet; the four-year-old bay filly Copyright, by Lord Russell, dam Novel, by Princess; second dam by Goldust, and the three-year-old bay filly Pueria, by Shamut, dam Pulia, by Harold; second dam by Belmont. To Judge A. E. Caffee, Louisville, Mo., the four-year-old colt Lord Vary, by Lord Russell, dam Vary, by Hambletonian 10; second dam by Seely's American Star. To Door Prairie Farm, La Porte, Ind., the four-year-old chestnut colt Meroc, by Mattherdon, dam Moss, by Woodford Mambrino; second dam Hermosa, by Edwin Forrest.

RECOMMENDS THE VULCAN. To whom it may concern.—I bought a Vulcan Chilled plow from Ed. Mitchell and can recommend it to any farmer who wants a chilled plow. For lightness of draft and working qualities it cannot be beaten. I have improved over any chilled plow I have ever seen. It is lighter draft, lighter to handle and does its work better. I take pleasure in recommending it.

Respectfully,
S. M. McPHERSON.

RECOMMENDS THE VULCAN. To whom it may concern.—I bought a Vulcan Chilled plow from Ed. Mitchell and can recommend it to any farmer who wants a chilled plow. For lightness of draft and working qualities it cannot be beaten. I have improved over any chilled plow I have ever seen. It is lighter draft, lighter to handle and does its work better. I take pleasure in recommending it.

Respectfully,
S. A. DUFF.

DEATHS OF OLIVER CHILLED.

This is to certify that I bought a Vulcan Chilled plow from Ed. Mitchell and can recommend it to any farmer who wants a chilled plow. For lightness of draft and working qualities it cannot be beaten. I have improved over any chilled plow I have ever seen. It is lighter draft, lighter to handle and does its work better. I take pleasure in recommending it.

Respectfully,
J. C. HAMILTON.

BETTER THAN ANY.

To whom it may concern.—I have used the Vulcan Chilled plow and can testify that it does good work; has improvements over any chilled plow I have seen, and it has a lighter draft. If I needed another plow I would certainly take a Vulcan.

Respectfully,
J. C. GATSKILL.

DEATHS OF OLIVER.

I have used the South Bend, the Oliver Chilled and the Vulcan plows, and can testify that the Vulcan is a better running and lighter running plow than either the South Bend or Oliver. I take pleasure in recommending the best chilled plow, to my mind, that is made.

Respectfully,
S. M. McPHERSON.

THE ADVOCATE.

FARM AND FARMER

The more animals are confined the more they suffer. We stand for them and nature.

The American government has prohibited the manufacture of cottons and woolen goods, and the sale of such goods from other countries. The prohibition is so radical that it has caused the American wool grower to turn to the use of the American wool grower.

The complaint that the smartest and the active young men prefer work in cities is largely the fault of farmers. If they pay so much a month, with perhaps two or three dollars variation to good, bad or indifferent, is it any wonder they get little good help? In the city, energy, activity and intelligence generally command what they desire. They are just as essential to a farm as anywhere.

A pair of curious Samson cattle were exhibited at Kansas City, Mo., a few days ago. They are exceedingly small, the male only weighing about 150 pounds, while the female weighs about 250 pounds. Both are fully developed and have very large heads and horns. These little cattle are said to eat two and a half feet in length and are of a reddish mouse color with white. They are called the Samson O.

It would seem, remarks the Atlanta Constitution, that the cattle breeders ought to adopt some system of caring properly for their stock. Their present method is wasteful and unprofitable. It is estimated that more than 1,000,000 cattle and other animals died last winter in the extreme Western and Southern States and Territories of neglect and starvation, and probably hundreds of thousands were frozen to death.

Running a dairy of cows so as to have them dry in the winter and have nothing to sell them when buttermilk and cheese are highest, is just about as smart, financially, for a dairy farmer, as it is for a manufacturer of reapers so to gauge his sales that he would not have a reaper to sell in the early summer and only fill orders late in the fall when the reaper is lying and there is no rooming to do. [Hoard's Dairyman.]

The American Dairyman says that however the matter may be decided, the cow, there can be no doubt that calves require considerable exercise in the open air in order to keep them in the best possible condition as regards health and vigor. They should have a run every fair day, and seasons in leading them should be given, so that they will readily yield to the rope when they become older.

Keeping of the calves in close confinement is so often done on farms that many animals are kept, most of them, in a condition of extreme debility.

A horseman who is an admirer of Nelson, said recently that he greatly doubted as to whether the famous stallion would lower his record this summer. He appeared to be deeply impressed with the fact that every fraction of a second counts when a stallion starts to beat 2:10. He said it was a very easy task to talk about beating 2:20 or even 2:10, but it is quite another thing to accomplish the task. Says the Commercial Farmer, Buffalo, N. Y., the two stallions, Stamboul and Nelson, separated by one quarter of a second, and yet how important is that fraction of Nelson, since it lifts him to the top of the list. He is expected to come east with Stamboul, and the expulsion of Nelson to be the whitewash from Maine to an opportunity to feel of the nation from the Pacific coast, and Stale.

There is any coarse hay, or poor fodder of any other description, to be worked off this season it should be disposed of very soon. Cattle will eat such material with a much better relish during the cold days of winter than they will in the mild weather of spring, and it is to be fed at all, and advantage should be taken of this fact.

But if the hay is very poor it may be a question whether it cannot be more profitably used for bedding than it can for feeding. If the material was originally poor, or if it was injured in curing, the animals cannot get a great deal of benefit from eating it, and it may be better to feed them a higher grade of hay and let the poor stuff go into the manure heap. But in case it is used for food the poor hay should be fed in small quantities, in connection with a much better quality of hay, with the addition of meal or bran. The giving of the poor fodder exclusively while it lasted, and then supplying better hay has often been practiced, but it is not an economical method of feeding. It does not suit the stomach and it does not pay the farmer. [American Dairyman.]

When a married man dirts with a woman, the other woman in town find out that there is a secret dirty she owe his wife. [Acheson Globe.]

Evangelist Moody says that the man who does not stop to pay the friends of the man who thinks he can sing. [Boston Record.]

WHY DO YOU COUGH?

Do you know that a little cough is a dangerous thing? Are you aware that it often fastens on the lungs and far too soon runs into Consumption and ends in Death? People suffering from Asthma, Bronchitis, Pneumonia and Consumption will all tell you that.

"IT STARTED WITH A COLD."

Can you afford to neglect it? Can you trifle with so serious a matter? Are you aware that

DR. ACKER'S ENGLISH REMEDY

For Coughs, Colds and Consumption is beyond question the greatest of all modern Remedies. It will stop a Cough in one night. It will check a Cold in one day. It will prevent Croup, relieve Asthma and cure Consumption if taken in time. "You can't afford to be without it." A 25 cent bottle may save you \$100 in Doctor's bills—save your life! Ask your druggist for it, or write to W. H. HOOKER & Co., 46 West Broadway, New York, for book.

Japanese Gardeners.

Prof. W. T. Brooks, of the Massachusetts Agricultural College addressed the Boston market gardeners last Saturday on "Gardeners in Japan." The farmers in Japan produce not only the food and clothing of the nation but a large part of the total export—rice, tea, silk and wheat. Only one-eighth of the land is under cultivation which is nearly all in hoed crops. Much of it is upon the mountain sides and cultivated in terraces. Rates of transportation are very high and land must be cultivated near the centres of consumption. In the United States the unit of production is the man; in Japan the land is the unit. The land is cultivated in a manner that is favorable. Individual holdings are from one-half to one and one-half acres, and two crops per season. Wages are 20 cents per day and a laborer does about one-quarter of what one in this country would do. Production is still very low, being barely enough for a good-sized family can be bought for two cents and two melons for one cent. The Japanese raise 65 species of plants affording green leaves for food, 17 species of lilies for their walls, many kinds of beans some of which are extremely delicious, turnips, a radish growing three feet long, egg plant, peppers, ginger root, sweet potatoes, field corn, melons, which are made to produce enormous crops by pinching back the lateral, cucumbers which are trained on bushes similar to peas, peas, and the bamboo which is used as we use asparagus.

The soil is cultivated with a hoe similar to our grubbing hoe. No weeds are allowed to find lodgement. Every form of fertility must be put in the crop. All manure is saved with great care. Night soil is scrupulously collected by the farmers and carried to their mountain farms in buckets at the ends of a pole balanced upon their shoulders. The price paid per bucket is eight cents. Along the shore fish is saved for fertilizer and secured is used to a limited extent. Manure is applied in a liquid state several times during the growth of the crop. A farmer worth \$150 is considered well off. American horsemen have done much to increase the hours of usefulness in Japan. Previous to its introduction they relied on the oil of plants for light.

Washing Out the Stomach.

The Scientific American says that during the last year several New York physicians have been successful in curing a novel treatment for dyspepsia and cancer of the stomach by washing out that organ. The process is very simple and not dangerous. A long, flexible pipe is passed down the throat until one end is in the stomach. The upper end of the stomach has been dilated, the funnel end of the pipe is turned down until it is lower than the bottom of the stomach, and the stomach is emptied as a barrel of any fluid is emptied through a siphon. The process may be repeated several times. The result is that the undigested food and mucus are washed out, and the hot water closes the blood vessels and reduces inflammation. The relief is immediate. The dyspeptic may have his stomach washed out before a meal, so that he can take a fresh start. After the last of a sufficient time for ordinary digestion, the stomach may be washed out again. This process has been in use in the New York Hospital, we are informed, for some time.

A puzzling phenomenon has been noticed frequently in some parts of Valley Bend District, Randolph county, Va., this winter. The crust of the snow has been covered two or three times with worms. Where they come from, unless they fall with the snow, is inexplicable. The snow is two feet deep, and the crust is too strong for them to have come up out of the ground. A square foot of snow can scarcely be found some days without a dozen of these worms on it.

When a married man dirts with a woman, the other woman in town find out that there is a secret dirty she owe his wife. [Acheson Globe.]

Evangelist Moody says that the man who does not stop to pay the friends of the man who thinks he can sing. [Boston Record.]

An Ingenious Device.

The application of the stereoscopic principle to magic lantern pictures, by which they appear to stand out from the screen in relief, has been accomplished in a most ingenious manner. As is doubtless known to our readers, in the ordinary stereoscopic two slightly dissimilar pictures are combined into one by means of properly formed lenses. In the magic lantern projection two lanterns are used, and the two pictures thrown into each other, as in the familiar dissolving views, the only difference being that in one lantern a green light is used and in the other a red. The colors being complementary to each other, the combined image on the screen appear to be of the usual white color. But if, now, the spectator places before one eye a piece of red glass, and before the other a green one, the combined pictures on the screen are separated, each eye seeing a different one corresponding to the color of the glass before it. But, by a well known law of vision, the two separate and slightly differing images are recombined by the eyes, and only one vision is perceived, but in relief, the image as when looking through a stereoscope. The effect is said to be surprising, and the only disadvantage of the method is that when the pictures are shown to a large audience, each spectator must be provided with a pair of spectacles fitted with glasses of the proper dyes. [Popular Science News.]

General Farm Work in March.

If moderate weather prevails much may be done toward forwarding the spring work. Work over the manure heap and it may be well to make one large heap in which that from the horse stalls, the cattle barns, the sheep sheds, the hogyards, the henry and the vants are all mixed together. It will make a compost more valuable than either of them would be if used alone, for general crops. Of course, if any one is wanted for a special purpose, as the horse-manure for hotbeds, or the like, reserve enough for such. It is true that this involves a question of considerable labor, but with the labor-saving horse and the farm, and a close looking after to keep the work well planned, a few days' labor at this season should be spared for any good purpose, and the working over and the heating in the compost heap fits the manure so much better for the little roots to take hold of, and destroys so many weed seeds, that it is actually a saving of labor in a very busy season. Carts, plows and machinery can be made ready for active work, harnesses mended and oiled, seeds and fertilizers bought and brought home, and many other things in this month, and much which will save time after the plow starts. [American Cultivator.]

A Steel Island.

In a paper read at the recent international iron and steel convention in Pittsburgh, Pa., Barnaby foresaw the possibility of building passenger steamships of a size which would at first sight seem suitable only to the kingdom of Brobdingnag. He put forward the great advantage of size in passenger ships, and stated that it would be perfectly practicable, with a water-draught of twenty-six feet, to build a vessel which would be quite steady in the sea, with a length of a thousand feet and three hundred feet broad. Such a vessel, he estimated, could be propelled with engines of sixty thousand horse-power at a speed of fifteen knots. This ship would have to be built afloat, and it would be a steel island, which would require to be fortified and garrisoned like a town. "I do firmly believe," he said, "that we shall get the mastery over the seas, and shall live far more happily in a marine residence capable of steaming fifteen knots an hour, than we can ever live in seaside towns."

A good many people spoil the effect of a good night's rest by the ridiculous heavy bedclothes they use. Old-fashioned cotton quilts, or modern Marshalls ones, are very heavy and of no use, as a thin covering to protect blankets from the dirt is all that is really necessary. Bedclothes should be like body clothing, light and warm. Many a sleeper would do well to see whether his coverings are not at the bottom of his restless nights. [Hospital.]

Green—"How was it the fox hunt turned out a failure?" White—"The fox struck; said he wouldn't run with non-union dogs."

MEDICAL.

No Money Required of Responsible Parties to Commence Treatment

C. H. BOGMAN, M. D.

The well-known SURGEON and SPECIALIST of Cincinnati, O., formerly Secretary of the Philadelphia General Hospital, and President of the CHAIRMAN of the Ohio Medical Institute, has for thirty years devoted his attention to the treatment of CHRONIC, NERVOUS, FEMALE AND SURGICAL DISEASES, such as Bronchitis, Catarrh, Cough, Rheumatism, all diseases of the Stomach, Bowels, Rectum, Liver, Kidneys, Bladder, Sexual Organs, Heart, Nerves and Brain; diseases of the Eye and Ear, Deformities, etc.

HE WILL BE AT THE COMMERCIAL HOTEL, MT. STERLING, KY., Saturday, March 14th, 1891, One Day Only.

Returning Every Fourth Week Thereafter.

CONSEALATION AND EXAMINATION IN FEE, and he will promptly tell you all about your disease and the prospects of a cure. He undertakes no incurable cases.

LADIES afflicted with any of the diseases mentioned above may consult him with perfect confidence, and the assurance of certain relief and permanent cure. Their cases will receive that kind and considerate attention which all appreciate. His treatment always proves satisfactory; local treatment is seldom necessary.

Quarantine Diseases, in their earlier stages, cured without pain or instrumental interference.

Scarcely is usually the result of carelessness or ignorance. It can be remedied.

Rheumatism or Gout cured by a never failing treatment.

Deafness, many cases can be cured.

Cancers permanently removed from the most delicate organs by our own peculiar method, little or no pain; no loss of blood; no knife or cautery; the only positive cure.

Scirrhus, Varicocele, Hydrocele, Spermatorrhea, and all unusual discharges permanently cured.

Many of all ages who suffer from Indigestion and excess will benefit by our counsel and treatment. If they observe certain symptoms in the urine or condition of the urinary organs, they should consult us without delay.

The doctor treats, with infallible success, all forms of Bacterial Diseases, such as Piles, Stricture, Pleurisy and Elevation of the Bowel, by a method of his own discovery, without pain or detention from business. He guarantees all cures.

Early interference is considered the best of judgment in all cases, and saves time, money, and health.

The success attained in the treatment of the cases which he makes his specialty is truly phenomenal.

Wonderful cures have been effected in old and difficult cases which have baffled the efforts of all others.

As his rooms are usually crowded it is better to call early in the day to avoid being disappointed.

Persons consulting him should bring from two to four ounces of their urine in a clean bottle for examination.

Patients treated by mail or express, but when possible personal consultation is preferable. List of cases sent on application.

All consultations, correspondence, and cases strictly confidential.

Treatment sent C. O. D. to any part of the United States and Canada. Address with postage for reply.

Dr. C. H. BOGMAN, Box 703, Cincinnati, O.
